The application has been amended as follows: in line 12 of claim 14 insert - -of each of the at least two indentations- - after the term "sidewall".

REASONS FOR ALLOWANCE

2. The following is an examiner's statement of reasons for allowance: the limitations of "...said nose forming a leading end of the projectile and being essentially conical in shape and comprising at least two indentations, each respective indentation being disposed in an external surface of the nose and essentially symmetrically in relation to a respective longitudinal plane axial plane coincident with a central longitudinal axis of said projectile and bisecting the respective indentation, each indentation having a curved profile from a first edge to a second edge symmetrical with respect to one of the respective central longitudinal axis of the projectile and the respective longitudinal axial plane, a trailing portion and a leading portion of each of the at least two indentations is curved and a portion of each opposed sidewall is straight and

connects the leading portion and the trailing portion and the portion of each opposed sidewall tapers away from one another upon extending from the leading portion to the trailing portion of the indentation..." in claim 14, the limitations of "...the nose being a leading edge of the projectile and being essentially conical in shape and comprising at least two indentations, and each indentation being disposed in an external surface of the nose and symmetrically in relation to a longitudinal plane bisecting the respective indentation and coincident with a central longitudinal axis of the projectile, each indentation having a curved profile from a first edge to a second edge symmetrical to the longitudinal plane, a perimeter of each of the at least two indentations comprises a curved leading portion, a curved trailing portion, a first straight edge sidewall connecting a first end of the curved leading portion with a first end of the curved trailing portion and a second straight sidewall connecting a second end of the curved leading portion with a second end of the curved trailing portion such that the first and second straight edge sidewalls taper away from each other upon extending from the leading portion to the trailing portion..." in claim 27 and the limitations of "...the nose having a flat leading central portion and being substantially conical in shape and comprising a plurality of indentations, and each indentation being disposed in an external surface of the nose and symmetrically in relation to a longitudinal plane, bisecting the respective indentation to substantially mirror image sections and coincident with a central longitudinal axis of the projectile, each respective indentation having a curved profile with a leading edge of each indentation being spaced from the flat leading central portion, a perimeter of each of the at least two indentations comprises a curved leading portion, a curved trailing portion, a first straight edge sidewall connecting a first end of the curved leading portion with a first end of the curved trailing portion and a second straight

edge sidewall connecting a second end of the curved leading portion with a second end of the curved trailing portion and a radius of curvature of the trailing portion is greater than a radius of curvature of the leading portion of each of the at least two indentations such that the first and second straight edge sidewalls taper away from one another upon extending from the leading portion to the trailing portion..." in claim 33 all are not found in combination in the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
